New Project Features

We have launched our new [Lane Closures page](#) on the website. In addition to a text description of the current and upcoming lane closures, we have an interactive lane closures map. This new map is a general representation of where each lane closure will take place.

You can also visit our [Project Timeline page](#) to see new phasing maps. These maps show what construction activities will begin in each year of the project.

Follow DFWConnector on [Twitter](#) to read tweets about major events, closures and traffic impacts.

May Construction Activities

Traffic on westbound and eastbound SH 114/121 between International Parkway and Main Street was shifted to new detour pavement.

Shifting traffic to detour pavement allowed us to begin work in the median of SH 114/121. Crews have already stripped topsoil - removed the top layer of grass and dirt. We have also started removing concrete and rebar - steel reinforcement bars - in this area.

We continue to work on several new southbound International Parkway bridges north of the DFW Airport. Work on these bridges includes constructing columns and caps. Caps are at the tops of the columns.

Crews have also begun work on the west side of the Main Street bridge. Visit our [Photos & Videos page](#) to see pictures of the demolition.

Bridge construction north of the DFW Airport

Other major activities that took place in May:

- Continued setting up the concrete batch plant north of SH 114/121 by Texan Trail.
- Completed detour pavement on westbound and eastbound SH 114/121 under Main Street and shifted traffic to this new pavement.

Concrete batch plant north of SH 114/121

What's Next?

Traffic on southbound SH 121 at International Parkway (north of the DFW Airport) will **tentatively** be shifted to new lanes from 8:00 PM Friday, June 11 to 3:00 PM Saturday, June 12. Please visit our [Lane Closures page](#) to see how the new lanes will look after the shift.

Once existing lanes in the median of SH 114/121 have been removed, we will begin excavation and embankment - moving dirt to the areas that need it.

Crews will also begin to lay temporary detour pavement on SH 114 west of Main Street. Eventually SH 114 traffic west of Main Street will be moved to this detour pavement so that the new westbound SH 114 lanes can be built.

Within the coming months, crews will perform the following bridge construction:

- Begin building the new bridge that will connect eastbound SH 114 and northbound SH 121 (north of the DFW Airport).
- Once columns and caps are complete, begin setting girders - horizontal bridge beams - on Main Street bridge and new bridges on southbound International Parkway (north of the DFW Airport).
